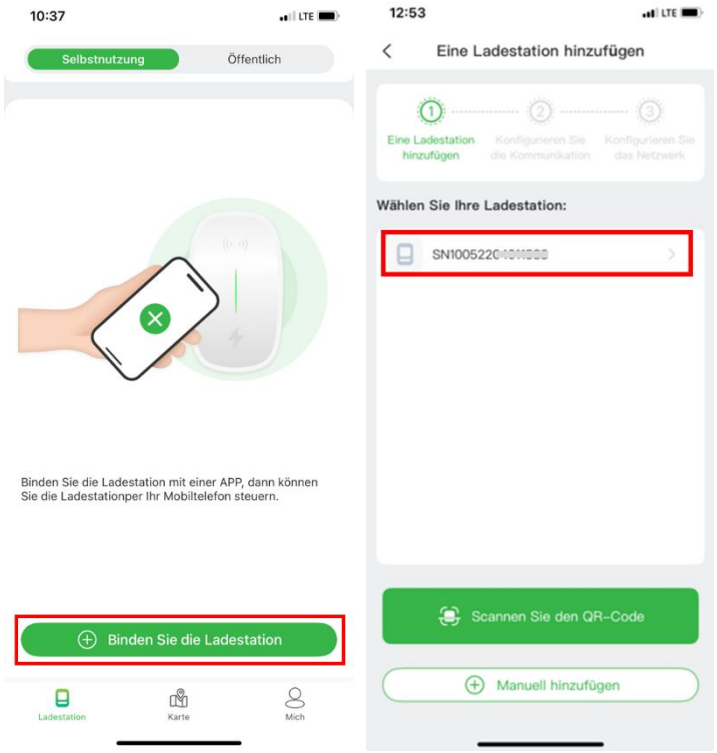
1 Register

1) Download the App Evchargo

2) activate Bluetooth, WIFI und GPS.
3) Register with your E-mail in the App and log in to your account.

2 Connect AXIbox to App

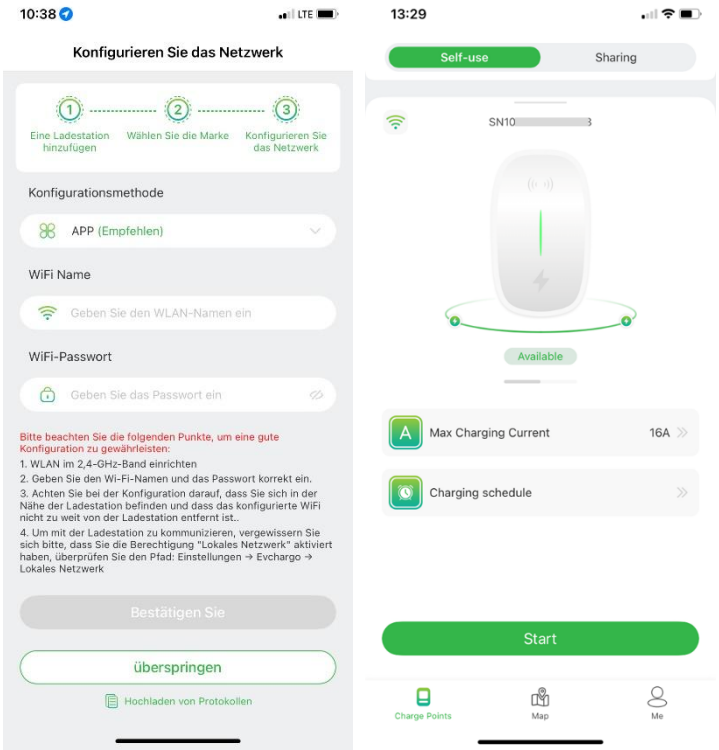
1) AXIbox needs to b e installed correctly prior to connecting to the App. Power up the AXIbox (green LED flashing slowly).
2) Select „Charge Points“ and then „Bind the Charge Point“.



3) Select in the following settings the serial number of your charger.

Note: It is necessary that the charger is found via Bluetooth. If this is not the case, the charger needs to be reset manually to reactivate Bluetooth. Please contact the support for more information. Manual input of the serial number or scanning the QR-code leads to an error.

4) Connect to your Wifi afterwards (enter Wifi name and password, then confirm).



It may take 30 to 60 seconds until the connection is established. Afterwards, the charger will be shown as available and can be controlled with the App.
